

EX.NO:6 – IMMUTABLE NATURE OF WRAPPER CLASSES (INTEGER AND DOUBLE)

Program:

```
class WrapperImmutableDemo
{
    public static void main(String args[])
    {
        // Integer Wrapper
        Integer i = Integer.valueOf(100);

        System.out.println("Before Modification");
        System.out.println("Integer Value : " + i);
        System.out.println("Hash Code    : " +
System.identityHashCode(i));

        // Modification
        i = i + 50;

        System.out.println("\nAfter Modification");
        System.out.println("Integer Value : " + i);
        System.out.println("Hash Code    : " +
System.identityHashCode(i));

        // Double Wrapper
        Double d = Double.valueOf(25.5);

        System.out.println("\nBefore Modification");
        System.out.println("Double Value : " + d);
        System.out.println("Hash Code    : " +
System.identityHashCode(d));

        // Modification
        d = d * 2;
```

```
        System.out.println("\nAfter Modification");
        System.out.println("Double Value : " + d);
        System.out.println("Hash Code    : " +
System.identityHashCode(d));
    }
}
```

Output:

Before Modification

Integer Value : 100

Hash Code : 1510467688

After Modification

Integer Value : 150

Hash Code : 1995265320

Before Modification

Double Value : 25.5

Hash Code : 746292446

After Modification

Double Value : 51.0

Hash Code : 1072591677
